LONDON FIRE BRIGADE
ENTERPRISES

The only evacuation equipment approved by
London Fire Brigade Enterprises

There is a common misunderstanding that it is the responsibility of the emergency services to ensure everyone evacuates from a building safely, it is not!

There is a legal requirement in many countries for employers and service providers to ensure the safe evacuation of mobility impaired persons in the event of an emergency.

We provide cost effective methods of ensuring the safe evacuation of non-ambulant persons from the upper or lower levels of buildings in the event of an emergency or when lifts can not be used due to maintenance or a power failure.

Our aim is to raise awareness, provide a professional market leading service and products and assist client to maintain compliance with statutory obligations.

GLOBEX is the only evacuation equipment approved by London Fire Brigade Enterprises

SERVICES:

- Tough slippery coated underside to assist transfer over floor surfaces and stairs
- Maximum capacity 150kg

£ 195.00 + VAT

Simply owning equipment does not mean compliance, it is essential there are suitable and sufficient procedures in place, trained operators and equipment is maintained.

Our certificated trainer and operator training courses are tailored to a client's needs and provide attendees with the necessary knowledge and ability to operate all types and makes of evacuation equipment.

To ensure clients meet the requirements of PUWER, Provision and Use of Work Equipment Regulations 1998 we provide certificated maintenance checks of all types and makes of evacuation equipment.

Our compliance packages provide peace of mind that clients are meeting the statutory obligations at a discounted fixed price for 3-5 years, this package also adds an additional year to our 5-year warranty on all our evacuation chairs.

Our authorised partners follow a comprehensive checklist when carrying out maintenance on your evacuation chairs and any work that needs to be done to them is carried out on site. If it can not we loan you a chair free of charge to ensure you remain compliant.

To complement our range of evacuation equipment we also supply a range of lightweight ramps that are quick and easy for deployment to assist with providing access and egress for doorways and steps.
